Aqua-Coast Engineering Ltd. - Building Envelope Consulting Engineers

At Aqua-Coast Engineering we provide building-envelope consulting and inspection solutions to the New Construction and Restoration Industry. We offer the following services:

- New Construction Building Envelope Consulting and Inspection services
- Building Envelope Assessment, Consulting and Restoration Project Management
- Roof Assessment, Consulting and Inspections
- Depreciation Reports, Annual Inspections and Building Envelope Maintenance Manuals

Aqua-Coast consists of an experienced team of Engineers, Project Managers and Field Consultants. We provide progressive, sustainable, and cost-efficient engineering services to clients in The Lower Mainland, Vancouver Island, Interior British Columbia and Western Canada.

Mission Statement

Our mission is to provide progressive and sustainable building envelope engineering solutions to the construction industry in Western Canada. With our breadth of experience in the pacific north-west construction industry, and our ability to provide adaptive envelope and waterproofing solutions in the challenging and diverse climate zones of Western Canada, the team at Aqua-Coast strive to foster enduring partnerships that will provide sustainable building practices for the future.

Diversity - Commercial, Hi-rise, Condominium, Townhouse, Single family

Aqua-Coast has the details and resources to ensure the building envelope and roofing membranes of your building project, whether new construction or restoration, meet the highest of standards.

Experience

For over 15 years Aqua-Coast has worked closely with developers, architects, contractors, property managers and strata corporations, providing building envelope and roofing solutions to both the New Construction and Restoration industries.

Aqua-Coast's on-site building inspection consultants all have many years of practical experience in project management and site supervision in the construction industry.

Efficiency

Aqua-Coast has the resources and staff to provide building envelope and roofing solutions to your project, in a time and cost-efficient manner.
